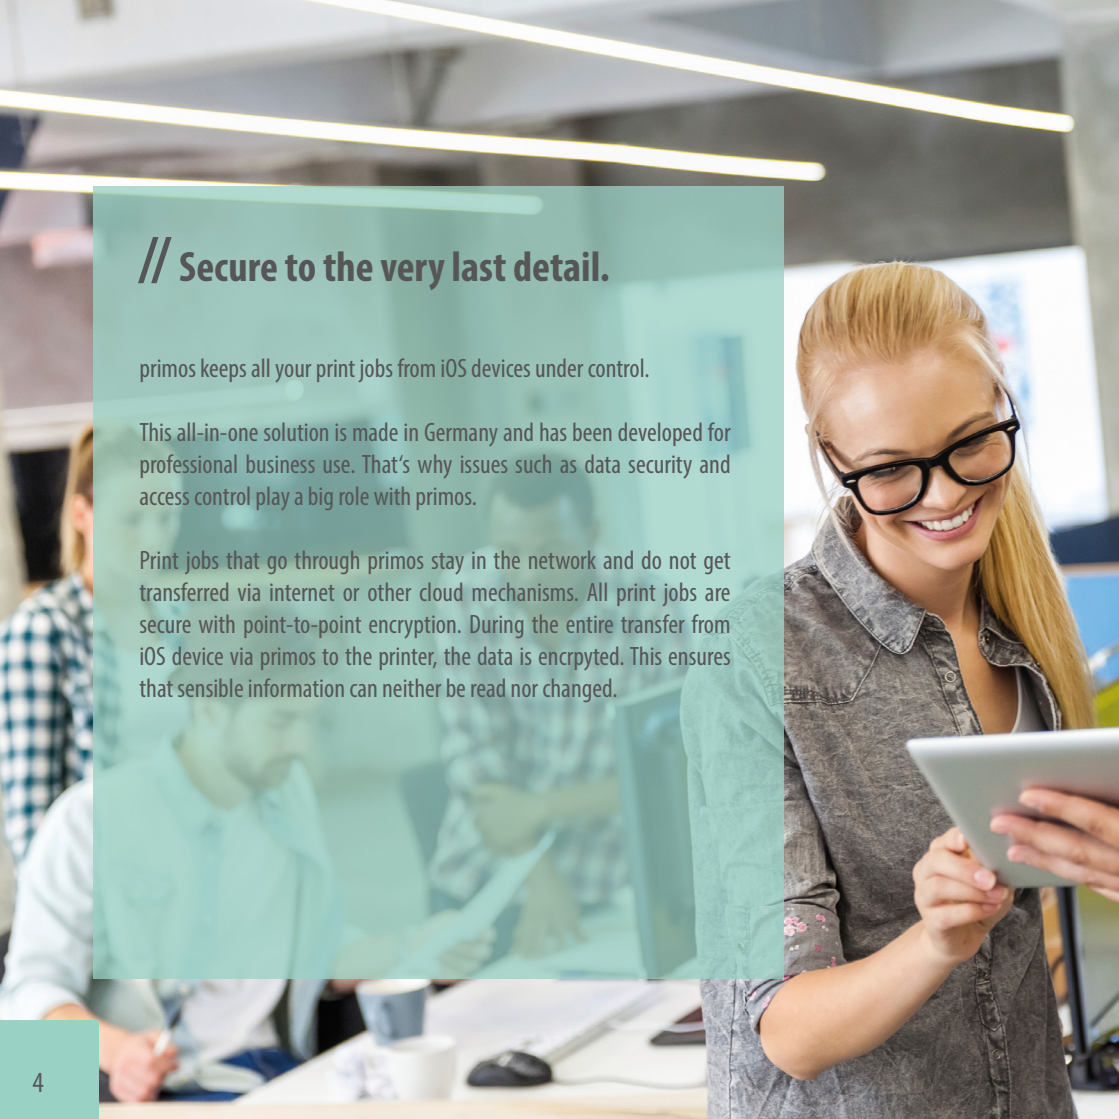
// Mobile Printing from your iPad and iPhone.

MOBILE AND SECURE PRINTING WITH YOUR iOS DEVICE ANYWHERE AND EVERYWHERE. WITH PRIMOS IT'S POSSIBLE.

The universal, mobile printing solution from SEH has been developed for professional business use. It combines innovative hardware and software in one compact device: simply print all your documents, graphics and pictures straight from your iPad and iPhone.

With primos you do not need an AirPrint printer nor a desktop computer to act as a print server. primos will save you lengthy configuration, driver installation and the multitude of printer applications. It doesn't matter what kind of printer you have: once primos has been connected to your company network, you are ready to print. Manufacturer-independent, easy and absolutely secure through authentication and point-to-point encryption.

primos makes printing easier than ever.



// Secure to the very last detail.

primos keeps all your print jobs from iOS devices under control.

This all-in-one solution is made in Germany and has been developed for professional business use. That's why issues such as data security and access control play a big role with primos.

Print jobs that go through primos stay in the network and do not get transferred via internet or other cloud mechanisms. All print jobs are secure with point-to-point encryption. During the entire transfer from iOS device via primos to the printer, the data is encrpyted. This ensures that sensible information can neither be read nor changed.

// Convenient.
// Flexible.
// Fast.

PRINT DOCUMENTS, PICTURES AND GRAPHICS DIRECTLY FROM YOU iPAD AND iPHONE.

SIMPLY AND WITHOUT EXTENSIVE CONFIGURATION.

With primos it doesn't matter what kind of printer you have, nor whether your printer AirPrint capable is or not. You just print directly over the network. It doesn't matter whether you are in your office, in a meeting or in a colleague's office: primos users can print company-wide not only in their own network but also in sub-networks. Just select the nearest printer from your iOS device and print.

DATA SECURITY

In order to ensure data security, you can define users and user-groups. primos authorizes print jobs using directory services.

primos supports directory services such as Microsoft Active Directory, Linux Open LDAP and Apple Open Directory.

Simply manage printers, drivers and access control with our user-friendly web interface.

The administration and maintenance of primos is incredibly easy.

// Compliant with data security.

PRIMOS ADMINISTRATION AND MAINTENANCE IS INCREDIBLY EASY.

INCREASE EFFICIENCY. PRINT INDEPENDENTLY.

A paperless office is still a vision of the future. Reality is that many documents still need to be printed in an office environment.

Whether it be an e-mail or the latest product presentation: in a hectic daily environment we often need to print something quickly and easily. We rarely have time to deal with printer apps or extensive configuration procedures.

primos is a handy solution that takes over all these tasks for you. As a professional, mobile print solution with native iOS capability, primos is designed for enterprise needs in a variety of branches. All you need to do is connect primos to your network and complete the initial set-up. Before you know it, you will be printing from you iPad or iPhone within the company network.

BENEFITS AT A GLANCE

SECURE

- Secure data encryption
- Authentification
- Local data administration (no cloud)

CONVENIENT

- Native iOS compatibility

- AirPrint compatible user administration
- Functions over many sub-networks (Wide-Area AirPrint)
- Directory services support (Microsoft Active Directory, Linux Open LDAP, and Apple Open Directory)

MOBILE.
SECURE.
FLEXIBLE.

ABOUT SEH

SEH specializes in professional network solutions. With more than 20 years of experience, SEH offers a broad range of expertise in network printing and USB virtualization solutions for all business environments.

The product portfolio includes myUTN (USB-to-network) USB device servers for accessing and managing USB devices across the network, including special solutions such as the myUTN-80 Dongleserver and the myUTN-800 Dongleserver. Network printing solutions by SEH include the ISD print appliances for efficient print spool management and a broad range of external (box) and internal (card) print servers for all common network types (Ethernet, Gigabit, fiber optic, Wi-Fi).

SEH also carries hardware solutions for optimizing ThinPrint and ThinPrint Personal Printing solutions by Cortado. All products are developed and produced at the company's headquarters in Bielefeld, Germany. Worldwide distribution is via SEH's US and UK subsidiaries and an extensive network of partners, distributors, and resellers.

In development and sales, SEH closely co-operates with many leading printer manufacturers, including CITIZEN, CORTADO, EPSON, HP, KONICA MINOLTA, KYOCERA DOCUMENT SOLUTIONS, MUTOH, OCÉ, PSi, ROLAND, SAMSUNG, TEC-IT, TOSHIBA TEC, UTAX, and ZEBRA. SEH is a VMware Technology Alliance Partner and a Citrix Ready partner.
